

Rough Website plan for a social media website based on Reddit  
for people in college to network : for companies  
to see motivated students' work.

When you open webpage:

Project Impact	home	search	Navigation
----------------	------	--------	------------

feed

Create post

Different forum posts...

Different forum posts...

App updates/news related to Project Impact

ex: "new club has joined"

"new company has partnered w/ us"

Profile Page

Project Impact	home	search	Navigation
----------------	------	--------	------------

Overview	posts	Comments	Saved
----------	-------	----------	-------

posts

posts

pro. pic.

edit button

username

Create new post

→ interests

→ social media

→ resume

ideas:

① want to be able to allow everyone to build their own portfolios on website for companies to look at

important features: resume [but not visible to other students], current projects : Club activity

Page for a forum:

Project Impact	home	search	Navigation
----------------	------	--------	------------

posts	wiki	marketing internships	Personal Projects	Help	Wanted	Marketing Milestones
-------	------	-----------------------	-------------------	------	--------	----------------------
